DIGITAL BUILT INDIA 2023

buildingSMART India

DIGITAL BUILT INDIA 2023

CDCPindia
INSPIRE | COLLABORATE | TRANSFORM

India aims to spend $1.4 Trillion building Infrastructure. Prime Minister launched Gati Shakti - National Master Plan for Multi-modal Connectivity, essentially a digital platform to bring 16 Ministries including Railways and Roadways together for integrated planning and coordinated implementation of infrastructure connectivity projects. With the goal of developing infrastructure to lower logistic costs and improve the economy. It is estimated that India Contributes to at least 25% of theGlobal Digital Content Production in the Construction & allied Infrastructure Space alone. India is a preferred engineering destination for several large MNC design firms. Besides the IT & ITES service providers from India constitutes to significant share of global digital content delivery efforts.

"Digital Built India focuses on bringing the best minds together to present, appreciate, promote and brainstorm. This is a first of its kind, an NGO driven digital event which promises knowledge sharing and neutral learning opportunity."

KEY HIGHLIGHTS

- **1st** buildingSMART India Event
- **25+** Expert Speakers
- **150+** Senior Delegates
- **1000+** Global Virtual Audience

PROGRAM AGENDA

INAUGURAL CEREMONY

The Inauguration Ceremony will observe eminent guests from the Government, Policy Makers, International Guests of Honor and Eminent Industry Leadership. We will also be releasing the INDIA Strategy Document and formally commence the India Operations of buildingSMARTIndia Chapter.

"INCLUSIVE" DIGITAL TWIN POLICY FOR INDIA

As India paves its way through the Amrit Kaal and marching confidently towards achieving its infrastructure goals, the policy makers and government has set vision to adopt digitalization as an integral part of the development. This is to ensure that we can achieve our goals efficiently with optimal resource utilization. Adoption of Digital Twin at a National Scale will require an “Inclusive” approach to ensure National and Stakeholder Interest. This session will touch down on critical implementation and strategic aspects of a National Digital Twin Program.

INDIA - BIM CAPITAL OF THE WORLD

India has been a Digital Content Producer for global AECO firms and is already a preferring destination for Global Engineering and Digital Services Outsourcing. With participation starting from Strategic to grass-root level implementation across projects in India and overseas, the Indian BIM Community brings in a global experience, scale and a great promise to serve the global community in addressing its BIM needs. This session will discuss opportunities and challenges around the same.

INFRASTRUCTURE DIGITALIZATION & "DIGITAL INTEROPERABILITY"

The mandates and push for Infrastructural Digitalization will result in production of more digital contents on projects across platforms. A Successful approach ensures that there is Digital Interoperability and Open framework across the programs and Owner’s/Asset manager’s interest is taken care of. In this session we will discuss about initiatives around OpenBIM and Digital Interoperability.

SUSTAINABLE MULTI-MODAL TRANSPORT (RAIL, AIRPORTS, ROADS AND HIGHWAYS)

India is the only country which has set ambitious infrastructural goals on one side and at the same time, we have also set a very ambitious goals on carbon management and sustainable development. Digital Technologies will assist in not only assessment of Sustainable parameters of Assets but will help in making the delivery more efficient. In this session we will discuss Carbon Management while marching towards achieving our infrastructural goals.

NATIONAL BIM STANDARDS – GLOBAL ALIGNMENT AND LOCAL APPROACH

A National BIM Standard is a need of the time and to secure India’s participation in the Global Market and to align with the economic vision of India, the Standards that we adopt must be in alignment with global standards. This session will touch down on real implantation issues of Standards, best practices, Strategic directions and frameworks which will be important for delivering a consistent digital outcomes on Projects.

Seize the opportunity and be a part of India's first event of its kind.

ABOUT BUILDINGSMART INTERNATIONAL

buildingSMART is a global community of chapters, members, partners and sponsors led by the parent body, buildingSMART International. The buildingSMART community is committed to creating and developing open digital ways of working for built asset environment. buildingSMART standards help asset owners and the entire supply chain work more efficiently and collaboratively through the entire project and asset lifecycle.
buildingSMART is the worldwide authority driving the digital transformation of the built asset environment, through creation and adoption of open, international standards for infrastructure and buildings. buildingSMART provides the perfect opportunity to help industry visionaries transform the design, delivery and operation of tomorrow's built assets. buildingSMART Is committed to driving change through the use of standards and the adoption of digital workflows. International open digital data-sharing standards are critical to this transformation, helping businesses – owners, architects, engineers, contractors and operators – become global industry leaders, while also mitigating risks, saving time, and reducing costs. buildingSMART is an open, neutral and international not-for-profit organisation.

ABOUT CDCPINDIA

founded in 2020, The Confederation of Digital Construction Practitioners (CDCPIndia) is an Indian National Society for BIM & Inclusive Digitalization. CDCPIndia is a non-government organization, a not-for-profit, non-commercial, and vendor-neutral National society registered under The Societies Registration Act, 1860 and The Bombay Public Trust Act 1950. CDCPIndia has been conceived and brought to life by a group of dedicated & experienced Indian professionals from the field of digitalization of built-environment. The primary mission of CDCPIndia is to Inspire, collaborate and advance Digital processes & technologies in the Indian infrastructure and construction sector. CDCPIndia is also the India Chapter of buildingSMART International and through this initiative, they promote transparent digital transformation processes, emphasizing an open BIM culture. CDCPIndia has also evolved a strategic framework for inclusive digitalization – "The INDIA Strategy". The philosophy of "Democratization of Data" and having "Empathy for all implementing Stakeholders" is at the core of The INDIA strategy (I-Inspiring Community, N-National Mandate, D- Democratization of Data, I – Incentivize, A – AID).
